

Panasonic

Side Discharge Central Heating and Cooling Heat Pump System

INTERIOS™ Serie

Extreme Heat Pump for cold climate

Ingenious Flexibility

100%

HEATING OUTPUT
down to -20°C (-4°F)
with COP up to 2.0

-30°C (-22°F)

CONTINUOUS OPERATION
as cold as -30°C (-22°F)

For areas that experience extreme cold, Panasonic offers a top-notch solution: the INTERIOS Side Discharge Heat Pump Serie. The INTERIOS condenser unit is capable of delivering 100% heating output down to -20°C (-4°F), also offering superior heating down to -30°C (-22°F).

Features

- Up to 18.0 SEER2
- Available in 1.5 to 5 ton models
- Superior low ambient heat output: 100% output down to -20°C (-4°F) with COP up to 2.0, continuous operation as cold as -30°C (-22°F)⁽¹⁾
- User customizable set point for heat pump to auxiliary heat change over temperatures
- Reduced replacement installation cost by using existing refrigerant lines and control wiring⁽²⁾
- Advanced inverter control
- Intelligent diagnostics and adaptive control system

⁽¹⁾ Depending on model

⁽²⁾ Refer to the installation manual for details on compatibility requirements

Exclusive **BI-COMM** Technology

Compatible with
485 & 24V

COMMUNICATION MODE

The Panasonic heat pump unit is able to precisely receive and process signals from the communicating air handler to manage the air temperature and airflow inside a home and maintain them at the most comfortable level.

SELF-ADAPT MODE

The Panasonic inverter heat pump has the ability to analyze the temperature and pressure change of the unit to adjust system operation. When matching the heat pump to existing equipment, even non-communicating, the system can function effectively as a communicating inverter combination so that homeowners can enjoy the benefits of inverter technology.

3rd party AHU

Probably **the Most Flexible** Heating Upgrade Solution Ever

The Panasonic system can flexibly mix and match with most other brand indoor units, outdoor units and thermostats, even without changing electrical wiring or refrigerant lines.

Core Features

Air Handling Unit

COMPUTATIONAL CONSTANT AIRFLOW

Computational Constant Airflow with an advanced algorithm automatically measures static pressure issues caused by blocked coils, dirty filters, kinks in ducts, etc. The ECM motor reacts to these conditions, adjusting the output power and fan speeds to ensure optimized airflow.

CONSTANT AIRFLOW

The Panasonic air handler is capable of ensuring optimal airflow even when the air passes through a high-density MERV13 filter.

Easy to Install & Maintain

Multi-Position Air Handler

Vertical or horizontal flexible installation.

Slide-Out Fan

Easily take out the fan motor for maintenance.

Magnetic Filler Cover

1 Click to replace the standard filter.

Easy-Access

Just remove 2 screws for access to the electrical board, blower and heater.

Intelligent Diagnostics

Easily accessible error code display.

Features

Panasonic INTERIOS™

Cased coil

The tubes and fins of the coil are made entirely of aluminum, which protects you from the corrosive elements circulating inside the house as well as offering maximum heat transfer. This allows for reliable and efficient operation.

DURABLE CABINET

Galvanized steel with a polyester urethane finish, 50% more corrosion-resistant than regular finishes.

INSTALLATION

Vertical up, vertical down or horizontal.
